# SRC

## SCARA 5R Robot
## Model: SRP350

SRC presents **Pioneer SRP350**, a SCARA 5R robotic system developed for light and semi-industrial automation applications, designed for handling, positioning, and automated processes.

SAKUTA

***ESTIMATED PRICE***
***$16,800***
**Estimated price subject to change. Shipping not included.*

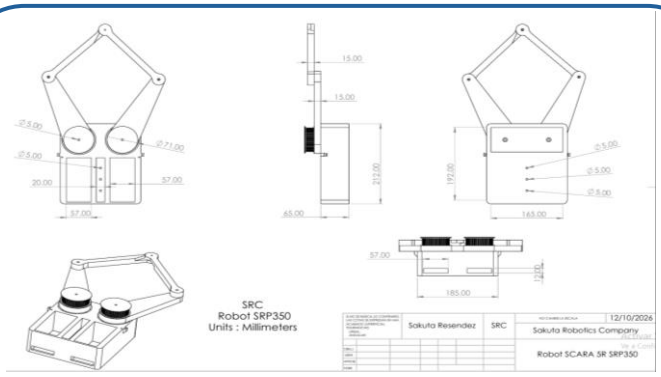

***3 integrated actuators.***

***2 DOF for the arm and 1 DOF for the end effector.***

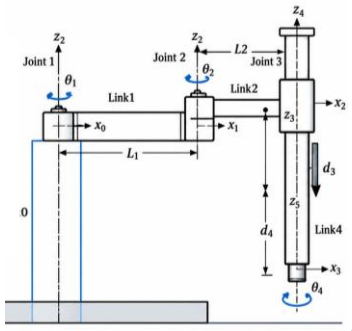

***Manufactured in PETG/Nylon using 3D printing.***

## *TECHNICAL INFORMATION*

- ***Total weight: 5.25 kg***
- ***System dimensions (folded): 15 x 40 x 42 cm***
- ***Delivery condition: Packaged and ready for shipping.***
- ***Compatible with a wide variety of systems.***
- ***Working radius: 353 mm***
- ***Easy integration into educational and research environments.***
- ***Education, automation, programming and control practice, as well as robotic project development.***

***SRC***
***Design inspired by robotic configurations used in industry and research.***

***Committed to technological innovation, we design and develop educational, robotic, and automation solutions in Mexico for education, research, and industry, offering functional, accessible, high-quality products. Designed and developed in Mexico by SRC.***

***We believe in the potential of robotics and automation as drivers of innovation. Therefore, we develop solutions that combine design, functionality, and technology to contribute to learning, research, and the evolution of industry.***

### *PROJECT DEVELOPMENT*

Project planning. → Project development. → Production and commercialization.
